1 1/4" Head Length

Say good bye to your arbor bands...

Unique structurally aligned tungsten carbide burs grind die stone without clogging and last almost indefinitely. They leave a smooth finish and do not clog up with die stone or epoxy material. Any residue can be cleaned off the bur with a brass wire brush or 5-10 seconds under a steam cleaner.

Full Arch

When grinding the buccal side, we recommend grinding in a downward motion rather than across the arch. Grinding across the arch will usually wear away the plastic and leave scuff marks.
